ABORTIONS

We have been in touch with the Family Planning Association, and they have told us that if a girl feels she might be pregnant and wants to have an abortion, it is very important to contact them as soon as possible. This way an evacuation abortion can be done saving time, money and stress.

Even two days after a missed menstrual period, a pregnancy test will show positive or negative. The girl should bring a morning specimen of urine for the best results. If the test is positive, one of our doctors will examine the girl and then refer her to the Family Planning Association.

Please do not hesitate to call us at the above number for further information.
